Stone Marine Services complete refurbishment of Shiplift capstans

Stone Marine Services engineers have completed the full refurbishment of four Shiplift capstans at HMNB Clyde. The capstans, which were built in 1989, have remained fully operational until the day they were removed for their overhaul. The work on the capstans has been done, one at a time, on an exchange basis starting in 2014, with the last being completed this year. The newly refurbished capstans benefit from an upgraded control system and the entire package is designed to survive at least another 25 years with only routine maintenance.
