### Field Service Engineer/Controls Technician

Stone Marine Services Ltd. specialise in repairs and maintenance of ship's propulsion systems, which includes controllable pitch propellers, shaft seals, gearboxes and steering gear. Due to expansion we require someone to fill the above position that can bring with him or her excellent service engineering and mechanical skills with customer facing activity.

The ideal candidate will demonstrate experience of working on bowthrusters, steering gear and CPP hydraulic systems.

To succeed in this role you must possess a practical knowledge of electrical/mechanical engineering and have adequate technical supervisory knowledge so as to be able to work on your own proficiently and make decisions to enable you to carry out the task without immediate supervision in the most efficient manner.

#### Key responsibilities include:

- Providing service, maintenance, repair and commissioning of machines without direct supervision, and within a pre-set timescale.
- Diagnosing electrical or mechanical problems with customers' equipment.
- Giving detailed technical reports on work carried out with recommendations for further work necessary to restore equipment to optimum operating efficiency.
- Liaising with customers to ensure work is being carried out to their satisfaction.
- To complete service reports/timesheets promptly and accurately to enable invoices to be submitted.
- To maintain regular contact with the Service Manager.

A willingness to learn and a positive attitude are essential, as successful candidates will be given product training both on site and at our principal production units.

You should possess a driving licence and be prepared for a considerable amount of travel throughout the UK, Northern Europe and worldwide.
